

project proposals

Hi everyone,

Just a reminder that your project proposal is due next week:

* By 5pm on *Wednesday*, Jan 21st, please upload to Canvas a single PDF slide describing your problem statement, the method, the data and your milestone goal. Please make sure to include the names of the team members and a project title in your slide. You will have 2 minutes to present this slide during lecture on Jan 22nd. Please make sure to rehearse your presentation in advance to make sure it fits into the allotted time.

* By 11:59pm on Thursday, Jan 22nd, please upload to Canvas your proposal writeup. This can be in any format that I can post on the course webpage (e.g., a PDF document or a Web page). If you draft your writeup as a Web page, please make sure to include all the pictures and the additional files for proper rendering of the page, and then compress everything in a single zip file. The writeup should be a self-contained document.

For both the slide and the writeup I only need one of the team members to upload the files. Late submissions will not be accepted. Please do not send me files via email.

Lorenzo
